R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

# We will use an inbuilt data set called mtcars

###############################################################################

# Question 1:

# use help (question mark) to see the details of the data set mtcars
# type your answer below this

?mtcars

# Question 2:

# explore mtcars data set using dim(), str(), colnames(), head() and tail() functions
# try to answer questions that follow
# type your answer below this

dim(mtcars)
